

Pacific Urethanes Official Opening

The Minister for Small Business Bruce Billson officially opened the new manufacturing and technical facilities at Carrum Downs on 27 November 2013.

"Small businesses are the real job creators in our local economy and so therefore it's pleasing to be able to open the expansion of a world-class business based in our own backyard," Mr Billson said. It was a very successful event for Pacific Urethanes with over 70 people in attendance including customers and suppliers.

Pacific Urethanes has more than 100 customers in Australia and Asia and exports to countries in the Asia Pacific region including Indonesia, Thailand, China, Vietnam and New Zealand.

Pacific Urethanes General Manager Owen Stam declared Pacific Urethanes was open for business and looked forward to serving customers, from its new operations at Malibu Circuit in Carrum Downs.

Bruce Billson the Federal Minister for Small Business, officially launches Pacific Urethanes state of the art polyurethane manufacturing and technical centre.

Pacific Urethanes supplies systems with Zero Ozone Depleting Potential (ODP).

From its start-up in 2008, Pacific Urethanes has only supplied Polyurethane Foam Systems with Zero Ozone Depleting Potential (ODP). More recently there has been a further move towards Zero Global Warming Potential (GWP) Systems.

Using its wealth of experienced formulation and application technology, Pacific Urethanes has developed zero ODP and low GWP foam systems to meet the market demand.

LANCER
BEVERAGE SYSTEMS

Hoshizaki Lancer Beverage Systems

Based in Adelaide, Hoshizaki Lancer is a world leader in Draught Beer, Soft Drink and Frozen Beverage Systems, Ice Machines and professional food service Refrigeration Units.

Environmental compliance is very important to Hoshizaki Lancer, having focused for many years on making their products and processes as environmentally compliant as possible.

When Pacific Urethanes approached Hoshizaki Lancer with their newly-developed zero ODP rigid foam formulation technology it was clear that only the best would meet Hoshizaki Lancer's exacting standards.

The Polyurethane Rigid Foam System used to insulate their products must be not only fully 'green', but also exhibit superior dimensional stability and excellent thermal insulation properties.

Trials and testing were carried out on Hoshizaki Lancer's production facility. Product testing was conducted at Pacific Urethanes' Carrum Downs technical centre. Pacific Urethanes is proud to count Hoshizaki Lancer among its growing number of satisfied customers.

Introducing our Staff Members

Our people are the core of our business.

Colin Groom our Business Development Manager, has been a key member of the Pacific Urethanes team for over 2 years. Colin has over 30 years of experience in formulating and application in the Polyurethane Industry.

He spent his early career in the UK with Marley Foam and W R Grace before moving to Industrial Urethanes South Africa in the early 1980's with a focus on the automotive industry. Moving to Australia in 2001 Colin broadened his application and formulating skills to include elastomers and rigid foam systems

Colin is an avid Tottenham Hotspur supporter in the English Premier League. Tottenham have improved significantly this season which has resulted in a chirpier Colin each Monday morning.

IN THIS ISSUE

The Official Opening

27th November 2013.

Zero Ozone Depleting Potential (ODP)

Pacific Urethanes has developed zero ODP & low GWP foam systems to meet the market demand.

Hoshizaki Lancer Beverage Systems

Product testing conducted at Pacific Urethanes meets our customers high standards.

Meet our staff

Colin Groom
