

NATIONAL MANUFACTURING WEEK 2015

26 - 29 May 2015 | Melbourne Convention & Exhibition Centre

Visit Pacific Urethanes at NMW15 - Stand No 5218.

NMW15 is the only fully integrated annual manufacturing exhibition showcasing the latest products and evolving technologies. It will be staged at the Melbourne Exhibition Centre from 26 to 29 May 2015.

This year the Safety First Conference, SMART Supply Chain & Logistics Conference and Austech the advanced manufacturing and tool exhibition will be co-located with NMW15.

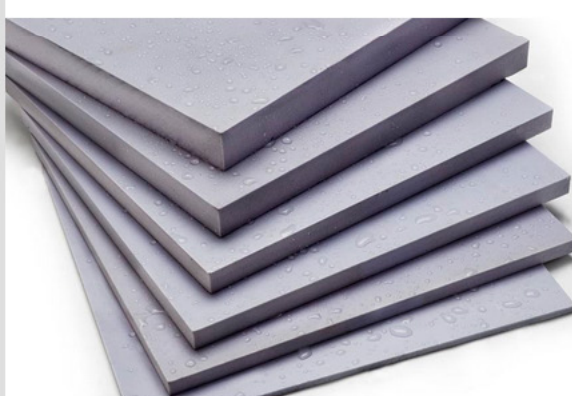

NMW15 allows you to source the latest products and services across all industry sectors, in one place at one time.

Pacific Urethanes is exhibiting again and will be showcasing the latest polyurethane systems technology and new developments from our partners.

We will also present the latest advances from OMS - one of the world's foremost manufacturers of polyurethane dispensing machines and integrated manufacturing plants. NMW15 is free for Trade visitors. Pre-registration and more information are available on the official website

nationalmanufacturingweek.com.au

To arrange an appointment on our stand during the exhibition please contact us on 1300 736 963

The MultiPanel polyurethane composite building panel system

The MultiPanel product is an exceptional rigid polyurethane foam, specifically developed by Pacific Urethanes. Their production Manager Peter Bell Manager presented Pacific Urethanes with a number of technical challenges which included the following requirements;

- Excellent flow capable of filling moulds 1200 x 2400 mm to produce moulded sheets with thicknesses varying from 8 to 30mm
- Even density distribution throughout the moulded sheet
- No air entrapment within the foam and over the surface of the moulding.
- Fast demould time.
- High Compressive Strength in excess of 2.0 MPa
- Fire Retardancy to ISO 3582 and AS 1530 part 3 using non - corrosive fire retardant additives.
- High Closed Cell Content making it 100% waterproof

Multipanel is a revolutionary, high density, polyurethane composite building panel that is super lightweight, 100% waterproof, eco-friendly and highly versatile.

The panel has a unique strength of 210kg/m³ making it stronger than traditional foam cores. It can also be thermoformed to create compound curves making it ideal for complex designs and superior to traditional building materials.

MultiPanel is up to 70% lighter than traditional sheeting products, easy to glue or screw and has excellent insulation and acoustic properties. These benefits allow limitless design applications for both interior and exterior projects.

Introducing our New Queensland Representative

Pacific Urethanes has appointed a new representative in Queensland.

We are pleased to announce that Bruce Wheate has joined the company and will be responsible for supporting our customers in that state

Bruce has many years of experience in technical sales for industrial coatings, adhesives and other polyurethane systems in Australia and overseas markets including Fiji, Vietnam and Kuwait.

Bruce will be introduced to our Queensland customers over the coming weeks. Improving our service is always our goal and this is another step forward in that direction.
