

Polycoat Products – A New Partner for Pacific Urethanes

Pacific Urethanes has signed an exclusive distributor agreement with Polycoat Products, a division of American Polymers Corp.

Polycoat Products, headquartered in Santa Fe Springs, California specialises in the manufacturing and custom formulating of high performance, monolithic, protective polyurethanes, polyurea, and polyaspartic coatings and linings for a wide range of applications.

Their innovative technology has resulted in Polycoat Products technologies being recognised as market leaders in this field. Polycoat Products aims to deliver the highest quality products, coatings, solutions, and service to their customers around the world.

Prashant Varshney, Polycoat Products International Business Manager visited **Pacific Urethanes** in February to assist with the introduction and training of their products to our team.

Polycoat Products leads the market in the development of these types of systems. Highly specialised products with extreme wear and chemical resistance are suited to applications in mining operations, chemical containment and waterproofing.

Polycoat Products have been used in this region for almost 20 years and **Pacific Urethanes** will continue to offer those products with a proven track record. The product range includes;

- Polyeuro MPL Range of Hybrid Polyurea
- Polyeuro 5510I5502F Pure Polyurea with superior physical properties
- Polyeuro 1050H a Copolymer Polyurethane with outstanding chemical and corrosion resistance
- Polyglaze Range of Waterproofing Aliphatic Topcoats
- Staingard Range of Polyaspartic Technology
