

## Pacific Urethanes R&D Centre has installed an industrial Spray Booth

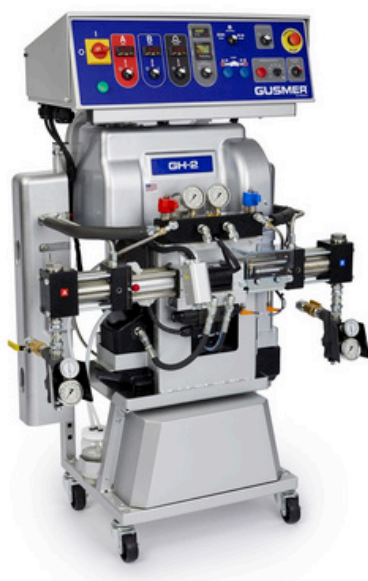

Pacific Urethanes is proud to announce that our Centre of Operations in Dandenong South has installed an industrial Spray Booth. This Spray Booth will allow us to safely trial new global technology to ensure we stay on the cutting-edge of Spray Foam & Spray Elastomer technology. The spray booth will also assist with customer trials, enabling us to replicate on site operations and provide training on Graco and Gusmer (exclusive to Pacific Urethanes) spray equipment.

Using the latest Gusmer Spray machine, Pacific Urethanes Spray Foam is easy to apply, incredibly quick to cure and acts as a highly insulative barrier against temperature and air loss. Our range of Spray Foam systems are able to be used in numerous applications, from domestic homes to commercial and industrial buildings.

Pacific Urethanes provide Spray Elastomers that offer high-performance, long term asset protection for industrial, corrosion and waterproofing applications.
